Rexnord® Planetgear™ Shaft Mount Planetary (SMP)

Rexnord's new hollow shaft mounting option

Now you have a choice. The Rexnord® Shaft Mounted Planetgear™ (SMP) Reducer Series is the perfect alternative to traditional helical shaft mounted reducers.

The new SMP Series incorporates all the standard Planetgear features you've come to expect for your heavy-duty applications. The self-aligning gear train in contact per reduction

to equally share the load, and is directly mounted on the driven shaft, eliminating the need for a low speed coupling, chain drive or reducer mounting base.

Our new Hercules reducer expands our offering to applications requiring output torque up to 2.9 million lb-in.
